

Please replace paragraph [0242] (page 42 of the specification as filed) with the following amended paragraph:

-- Felidovac® PCR (InterVet), a feline inactivated trivalent vaccine that is commercially available in Japan, was used as the adjuvant. This vaccine contains Adjuvant L80 and aluminum hydroxide. 1 mL of antigen adjusted to 16 units/mL and 1 mL of Felidovac® PCR (one dose) were combined and mixed well to produce the vaccine. 2 mL of the resulting vaccine was used in a single dose. --
